SKILLS

Languages:	Python, C, C++, Java, SQL
Tools/Platforms:	Excel, Git, Hadoop, Tableau, Jupyter Notebook
Libraries:	Pandas, NumPy, Matplotlib, Seaborn
Soft Skills:	Leadership, Project management, Adaptability, Collaborative, Problem solving

TRAINING

Bootcamp PL/SQL - Summer Training on Data Science, PL/SQL July 2025

- Successfully Gained and revised additional knowledge of Structured Query Language methodology, by working on bigger datasets.
- Learned the basics of PL/SQL programming including blocks, variables, and control structures.
- Gained experience in exception handling and cursors for efficient query execution.
- Developed practical skills in writing and managing stored procedures, functions, and database triggers to automate tasks.

Bootcamp | LPU | Python - Python for Data Science Nov'2023

- Completed Python bootcamp covering core concepts including data types, control structures, functions, and OOP fundamentals.
- Implemented problem-solving programs and logic-based coding exercises to strengthen programming skills.
- Worked on data handling techniques including file operations and basic data processing tasks.
- Improved debugging, code optimization, and logical thinking through hands-on practice and mini projects.

PROJECTS

Iris Classifier Using Python & Scikit-learn Feb'2026

- Developed a machine learning model using Python and Scikit-learn to accurately categorize Iris flower species.
- Conducted data preprocessing and EDA with Pandas and Seaborn to identify key feature correlations.
- Trained classification algorithms, including Logistic Regression, to build a robust model with high predictive accuracy.
- Evaluated model performance using confusion matrices and accuracy scores to ensure high classification reliability.

Analog Watch Web Application | HTML, CSS, JavaScript Jan'2026

- Developed a real-time analog watch using HTML, CSS, and JavaScript, simulating a traditional clock interface.
- Implemented dynamic rotation logic for hour, minute, and second hands based on current system time.
- Designed a responsive UI with smooth animations ensuring cross-device compatibility and better user experience.
- Optimized UI performance with smooth CSS transitions and efficient DOM updates for seamless user experience.

Fire Department Calls for Service Analysis | Python, NumPy, Seaborn, Matplotlib Sep'2025

- Analyzed Fire Department Calls using Python and NumPy to extract meaningful patterns and insights on San Francisco Dataset.
- Performed data cleaning, preprocessing, and statistical analysis to identify trends in call frequency and response times.
- Created visualizations with Seaborn and Matplotlib (histograms, boxplots) to highlight seasonal, and category-based patterns.
- Delivered actionable insights through automated data validation and cleansing workflows ensuring 100% data integrity.

CERTIFICATES

Programming in C Language Data Mar'2026

Data Analysis with Python Mar'2026

Bootcamp in PL/SQL Jul'2025

Legacy Responsive Web Design V8 Dec'2023

EDUCATION

Lovely Professional University Phagwara, Punjab
Computer Science and Engineering Data Science with ML Aug 2023 - Present

Navyug Convent School Nazafgarh, New Delhi
12th with Science — Percentage: 82% April 2021 – May 2022

Navyug Convent School Nazafgarh, New Delhi
10th with Science — Percentage: 80% April 2019 – May 2020
